PERSONAL PROJECTS

- benpapp.com, a digital portfolio to showcase my personal projects.
 - Currently hosted on Google Firebase with Integration to Google Cloud.
 - Built from the ground up with HTML/CSS.
 - Currently Working on recreating the portfolio through React to create a more intuitive user Experience.
- The Gambler's Descent, a prototype roguelike game.
 - Utilized Jira and Agile to determine tasks and priority for development of the game.
 - Used Unity/C# to create the groundwork of the game for a demo.
- View benpapp.com for more information about my projects

PROFESSIONAL EXPERIENCE

Student IT Computer Tech, Michigan Technological University, Houghton, MI

September 2022 – Current

- Provided technical support to students, faculty, and staff for computer hardware, software, and networking issues.
- Utilized Microsoft Azure and Intune
- Used Telecom Sysadmin Utilities to verify on-domain connections for machines on campus.
- Troubleshot and resolved technical problems related to computer hardware, software, and network connectivity.
- Recognized by management as a quick learner and leader among newer employees.

Sales Associate, Wal-Mart, Kingsford, MI

June 2019 – July 2023

- Maintained an organized sales floor and ensured that products were properly displayed and stocked.
- Collaborated with team members to meet sales goals and ensure customer satisfaction.
